

# PH7 Portable Humidifier

7.5L/Hr

- Low pressure humidifiers work by spraying water through centrifugal force. Unlike high-pressure systems, the water is sprayed into the room in the form of a very fine mist (water droplets below 20  $\mu$ ) which evaporates immediately - resulting in minimal limescale deposits.
- The humidification capacity is constant and independent of temperature and humidity level.
- Control of an external mechanical hygostat (option)
- Adjustable capacity from 1 to 7 l/h
- It reduces electrostatic charges
- IP 56

*Low-pressure humidifiers are characterized by easy and cheap installation.*

## Technical Data

Average Power Consumption : 250 W.  
Performance : 1-7.5 l/h  
Air Flow : 390 m<sup>3</sup>  
For the Volume/Area of the room : 1200 m<sup>3</sup> / 500m<sup>2</sup>  
Working Temperature Range : +1 o C - + 35 o C

Humidity Range - work : 0% RH - 100% RH  
Water supply from the mains : 200... 600 kPa  
Weight : 13kg  
Dimensions WxDxH : 420 x 373 x 507mm
